Hello,

My name is Chris Baird, and I am a masters student at Montana State University - Bozeman. I am working with other graduate students in the Department of Earth Sciences to plan this year's Earth Science Student Colloquium. In the past, MAGIP has provided support for our GIS students by serving as judges for a GIS poster competition at this event. We are reaching out to you to ask if MAGIP would be interested in continuing this collaboration for our Student Colloquium this year which will be held on Thursday, April 14th, in the Strand Union Building ballroom A. In past years MAGIP has sent 2-3 people to serve as judges for this competition and has provided a small financial award for the top contestants. The winners of this competition will be notified during our dinner and award banquet. We think that awarding students who conduct excellent GIS-based research is a great way to encourage our students to further their GIS-focused work and also to promote GIS research across the department. MAGIP is welcome to attend the entire event, which

I'm unsure of what MAGIP has committed in the past for financial awards for the top three GIS research posters. I would suggest offering \$100 for 1st prize, \$75 for second prize and \$50 for third prize. With that being said, The ESCI Student Colloquium would be happy with any dollar amount that MAGIP would be willing to provide. If a financial award is not possible, we would still be thrilled to have MAGIP involved in our colloquium and would still ask have your judges choose the top 3 GIS based posters.

Thank you for your time and for considering my request.

Best,  
Chris Baird
